3 Functional Requirements Evaluation

Refer to the VnV Plan for descriptions of the tests derived to evaluate the functional requirements.

3.1 Game Active State

Test	Expected	Actual	Notes	Result
GA-1	System variable 'gameInProgress' set to false.	System variable configured correctly.		Pass
GA-2	System variable 'gameInProgress' remains true.	System variable configured correctly.		Pass
GA-3	System variable 'currMode' changed to represent the selected user mode.	User mode unchanged.	Design changed, user mode not switchable while a game is active. Test fails by design.	Fail
GA-4	System variable 'gameInProgress' set to true, 'currFEN' variable is set to the starting FEN.	System variables configured correctly.		Pass
GA-5	System variable 'gameInProgress' set to false.	System variable configured correctly.		Pass
